

Quality, Environment, Occupational Health and Safety Policy

In order to achieve the vision of our leadership aimed at strengthening the cooperation between the government and the Federal National Council (FNC), and promoting political participation awareness among the Emirati people, the Ministry of State for Federal National Council Affairs (MFNCA) is working on developing an innovative model designed for enhancing the coordination processes between the legislative and executive authorities to reach the future government status, through the constant review of its directions and the continuous development of its programs and projects and the launch of innovative initiatives that will enable UAE national to be ranked first in the world, through the following:

- Continuous development of quality, environment, occupational health and safety management system through the establishment of goals and continuously reviewing it, ensuring the dissemination of its concepts, the dissemination of best management and occupational practices and the development and improvement of services provided which support MFNCA's strategy.
- Compliance with all relevant requirements, legislations, laws, regulations and instructions.
- Provision of continuous training and raising awareness among employees in quality, environment, occupational health and safety management system.
- Provision of high quality services to achieve customers' happiness and exceed their expectations.
- Reducing occupational injuries and diseases, protecting the environment and preventing environmental pollution and all health and safety hazards associated with MFNCA's context, activities and services.
- Taking necessary actions to control occupational health and safety hazards through the hierarchy of controls.
- Engagement of employees in the decision-making processes within the occupational health and safety management system.

MFNCA and its employees believe that the implementation of this policy is achieved by deploying quality, environment, occupational health and safety management system in accordance with the requirements of ISO 9001:2015, ISO 14001:2015 and ISO 45001:2018 and periodically reviewing the system as per the approved processes.
